**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Notice of Amendment***

In response to the amendment filed on October 25, 2007, amended claims 37-42; new claims 44-46 and canceled claim 43 are acknowledged. The following new grounds of rejection are set forth:

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 45 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 15 recites the limitation "the CPU" in line 2 of the claim. There is insufficient antecedent basis for this limitation in the claim.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 37-42 and 44-46 are rejected under 35 U.S.C. 102(e) as being anticipated by U.S. Patent Application Publication No. 2003/0139661 to Kimchy et al.

**In regard to claims 37-38 and 41-42,** Kimchy et al. disclose a medical apparatus 20 adapted for use with a capsulated medical apparatus 12, said capsulated medical device having an imager for obtaining an image (see paragraph 0316), said capsulated medical device transmits a signal of image data to an external reception apparatus 18 that is placed outside of the body, the medical apparatus being placed outside of a body and is different from the external reception apparatus the external reception apparatus includes a storage section 36, 38 (see Fig. 1a and paragraph 0333), the medical apparatus comprising: a communication section 46 capable of at least receiving the image data of the image from the external reception apparatus; a drive power supply section including a battery for supplying a driving power to at least the communication section; and a display section for displaying at least the received image data (see Fig. 1b). Kimchy et al. teach wherein the computer station 20 may be a personal computer, a minicomputer, a laptop, or the like (see paragraph 0338). If a laptop is implemented in a system, then the drive power supply section would inherently include a battery for powering the system as is well known in the art. A laptop is also fully capable of supplying driving power from an external power supply. Furthermore, the words "for" and "adapted to" in the claims may be properly interpreted as "capable of," and "capable of" does not require that reference actually teach the intended use of the element, but merely that the reference does not make it so it is incapable of performing the intended use.

**In regard to claim 39**, Kimchy et al. disclose a medical apparatus, further comprising a signal processor 34 (and/or processor of computer 20) which processes the image data to display the image (see Figs. 1a-c and paragraphs 0333-0338).

**In regard to claim 40**, Kimchy et al. disclose a medical apparatus, wherein the communication section 46 is capable of transmitting data to the external reception apparatus 18 (see paragraph 0338).

**In regard to claim 44**, Kimchy et al. disclose a medical apparatus, wherein the external reception apparatus comprises a central processing unit 34 adapted to read image data stored in the storage section 36, 38 (see paragraph 0333).

**In regard to claim 45**, Kimchy et al. disclose a medical apparatus, wherein the communication section 42 is connected to the CPU 30 (see Fig. 1c).

**In regard to claim 46**, Kimchy et al. disclose a medical apparatus, further comprising a control section (i.e. keyboard not labeled in figure 1b).for controlling the display section.

### ***Response to Arguments***

Applicant's arguments with respect to claims 37-42 and 44-46 have been considered but are moot in view of the new ground(s) of rejection.

### ***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Matthew J. Kasztejna whose telephone number is (571) 272-6086. The examiner can normally be reached on Mon-Fri, 8:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Linda C.M. Dvorak can be reached on (571) 272-4764. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
